District News

From Our Correspondents

ENSIGN

Mr. and Mrs. E. Penstock returned from a week's holiday at Sylvan Lake.

Marlene and Yelonde Larkins have been visiting with Margaret Ann and Marion Collison this past week.

The monthly meeting of the Ladies Aid will be held on August 18th at the home of Mrs. E. Penstock.

A large number of ladies attended a shower held in honor of Mrs. Russell Markert on Monday Aug. 9. Many lovely gifts were presented to her with Mrs. F. Markert, Mrs. A. Markert and her twin sister Jean assisting in opening the parcels. Hostesses were Mrs. L. Smith, Mrs. Fred Markert Jr. and Mrs. N. Flebotte.

Mr. and Mrs. Steve Parker and family from Trail, B.C. are visiting with Steve's parents, Mr. and Mrs. Harold Parker.

Mrs. E. Thorp has returned from a holiday in Banff.

Mrs. J. Tuck and family have returned home after spending the past two weeks with her parents, Mr. and Mrs. B. Brown.

RED CROSS

Miss Barbara Scott, who has been spending the past few weeks at the home of Mr. and Mrs. A. Jacobson, has returned to her home in Calgary. She was accompanied by Miss Clara Jacobson, who remained in the city for a few days.

Mr. and Mrs. Alvin Fulton were Calgary visitors on Saturday.

Mr. and Mrs. Francis LaFontaine are being congratulated on the birth of a daughter.

Sunday guests at the Plourd home were Miss Margaret Plourd of Calgary and Mr. and Mrs. Glen Bateman and daughter.

D. C. Sullivan of Olds was a weekend visitor at the home of Mr. and Mrs. Andy Knive.

Mr. and Mrs. Glen McLennan were Calgary visitors last week and returned home with a 1949 Mercury car.

Mrs. Dorothy Sullivan of Lethbridge and Miss Lorraine Goldie of Vancouver were guests at the home of Mr. and Mrs. Andy Knive for a few days last week.

Mr. and Mrs. A. Love were Calgary visitors last Tuesday.

Honors for the first harvesting operations in the district go to Clay Snow. Mr. Snow threshed fall rye with a pickup combine last week. Friends would like to know if the ducks Clay has been feeding are the local variety or from Lake McGregor?

Mr. and Mrs. D. L. Doane, accompanied by Mrs. Pete McIntyre, were Lethbridge visitors the first of the week.

Miss Phyllis Sherbourne, who has been visiting in the district, has returned to her home at Hoadley. She was accompanied by Miss Ruth Chapman.

KIRKCALDY

Mr. and Mrs. D. McKay have as their guests the former's brother and sister-in-law and family, and Mr. and Mrs. J. McKay of Kimberly, B. C.

Mr. and Mrs. Wayne Brown and family of Dawson Creek are visiting at the home of the latter's parents, Mr. and Mrs. W. Todd.

Mr. and Mrs. O. McCurdy, of Grande Prairie are visiting with friends and relatives in the district.

Mr. Bill Gese is holidaying with relatives in Edmonton.

Mr. and Mrs. Ed Kehr, Mr. Russell Robinson and Mrs. Gerry Geddes and family of Winnipeg were guests on Sunday at the home of Mr. and Mrs. Bert Maisey.

Miss K. Colwell is enumerator for the Kirkcaldy Polling Division. The Berrywater Cobras played ball against the Kirkcaldy Kittens on the local diamond Sunday with the Kittens winning by a score of 12 to 8.

Mr. and Mrs. F. Clapp and daughter Alva of Champion were Kirkcaldy visitors Sunday.

Otto Hagg, W. Brinton and H. Pearce went fishing over the weekend, and although they were rained out, Otto Hagg caught a fourteen-inch trout.

The Dorch Bros., John and Henry, motored to Blackie on Sunday to visit with friends.

Miss Ruth Hanna of Vulcan was house guest of Mr. and Mrs. H. Spaeth over the weekend.

Mr. Sherran of Calgary was a business visitor in the district on Saturday.

Routine Business At Regular Town Council Meeting

All members of the town council were present at the regular meeting held Monday evening of this week.

Inhalator Purchased

M. D. McIntyre, representing the Lions Club, interviewed the council regarding the purchase of an inhalator. Council agreed to pay half the cost of the inhalator, which would be kept at the swimming pool during the summer season and at the Fire Hall the balance of the year.

Pool Recommendations

A letter was received from the Department of the Attorney-General regarding the implementation of the recommendation brought in by the coroner's jury at the inquest into the death by drowning of Donna Layercraft. All recommendations made have been carried out.

Enumerator

Town secretary J. L. Findlay was appointed as enumerator.

Building Permits

A \$200 permit was issued to John Grant for the addition of a front porch to his residence, a \$500 permit to John Mitchell for a garage, and a \$5000 permit to W. Marks for the bringing in and renovating of a residence.

Fire Siren

A 7 1/2 h.p. fire siren has been ordered for immediate delivery.

Road Signs

New school zone road signs are expected shortly and other road signs have been ordered.

Sidewalks

The building of sidewalks and standardization of curbs was discussed. It is not expected that the contractor will be able to start on the new sidewalks before the end of this month.

Sell Grader

It was decided to sell the old street grader.

Garbage Removal

Residents will be asked to co-operate in garbage and ashes by having suitable garbage containers, etc.

Fourteen scientists and airmen have left for the far north on the annual hunt for the north magnetic pole. Seems the pole keeps moving around and that no one is quite certain exactly where the pole is located.

67 Donors Attend Sixth Red Cross Blood Clinic

Number of Donors Down From Previous Visits

The Canadian Red Cross Mobile Blood Donor Clinic paid its sixth visit to Vulcan on Thursday, August 5, when 67 persons attended to donate blood.

Much publicity was given prior to the clinic date and 155 notices were sent out to previous donors and others who registered, but it was to be regretted that scarcely 50 percent of those notified responded. A few notified the committee that they would be unable to attend, but the big majority did not. The giving of one's blood must be a voluntary gesture on the part of the donor and all that those who are promoting a clinic can do is to advertise the date and send out cards.

The setting up and maintaining of blood banks, which provide free blood transfusions for every man, woman and child whenever needed, can only be kept up if all do their part in this great humanitarian service. Sickness is no respecter of persons—who knows when they or some member of their family will be in need of a blood transfusion?

The Red Cross Mobile Clinic, with its staff of twelve nurses, technicians and V.A.D.'s comes well prepared to very efficiently handle a large number of donors in a short time. As the clinic comes all the way from Calgary, it is felt that at least 100 donations of blood must be received to make it worthwhile.

Miss Gay, the nurse in charge of the mobile unit, expressed herself as being highly pleased that the clinic could be held in the Legion Hall, which, with its conveniences, is about the best accommodation they have had in all their travels.

Locals nurses who assisted at

NOT MUCH CATCH TO THIS

All are catchers but you'd never know it. These Brooklyn Dodgers are Gil Hodges, Roy Campanella and Bruce Edwards, all backstops, but not all working at their trade. Hodges is playing first base and Edwards third base. Campanella is catching but he's also an outfielder. The Dodgers are short-handed.

Less Grain Marketed In Past 12 Months Than Previous Year

Figures supplied the Advocate by courtesy of Lionel Chell, Alberta Pacific Grain Co. agent here, show that in the year from August 1st, 1947, to July 31st, 1948, a total of 1,031,000 bushels of wheat was marketed through Vulcan's eight elevators. Coarse grains marketed here in the same period totalled 88,000 bushels.

Marketings were much heavier in the previous year of 1946-47, when a total of almost two million bushels of wheat and coarse grains passed through the local elevators.

These figures do not include grain received at the Kirkcaldy and Ensign elevators.

At July 31 of this year grain in store at the local elevators totalled 67,000 bushels.

Railway figures show that in the twelve months ending July 31 there were 584 cars of wheat and 35 cars of coarse grains shipped from Vulcan.

It is anticipated that this year's harvest will be much heavier than that of 1947.

Only One Fear Left

(From The Printed Word)

Productivity per man-hour—or lack of productivity per man-hour—is the greatest problem facing industry. Some may say that working hours are too few. This would be only a minor problem, and perhaps no problem at all, if the postwar workers in general were as productive as were pre-war workers in general.

Motor-car speedometers have gauges to register 100, 110 or 120 miles per hour. Railway trains go faster than before but sit longer in stations. The airplane can travel faster than sound. In every industry using machinery, new devices enable that machinery to produce more goods and better goods.

Man is learning to run faster, swim faster, jump faster, jump higher and broader, and skiing on gentle slopes is passe. In the realm of sport and recreation there is keen competition to do more, do it oftener and do it better.

In the matter of work—and work alone—man wants to do less per hour on a 40-hour week than he did per hour on a 48-hour week, 56-hour week, or, to go back half-a-century, 60-hour week.

It isn't as if the work took more out of the worker, either mentally or physically. Every new machine is designed to reduce fatigue. Industry now seldom requires muscles. Most plants even have ingenious hoists, trucks and conveyors to move the stuff about. Today anyone with reasonably well-coordinated finger-tips can do any job, including moving mountains.

There can be nothing but praise for those groups of workers who are doing their share out of pride of craftsmanship and of loyalty. But there are groups of younger and supposedly more vigorous employees whose failure to produce in the fewer hours they are supposed to work brings down the average for a plant, adds unnecessarily to costs, and contributes to the high prices of which they are ever prone to complain.

Fewer hours per worker must be accompanied by more hours per machine. Machines are constantly becoming more intricate and costly. They must be worked more hours if interest and depreciation and obsolescence and house-room are not to make them too costly an investment.

The worker must learn, also, that he must not use all his energy in his recreation and leave nothing over for his job, and thus be like the man who played 36 holes of golf every weekend and was always so exhausted that his wife had regularly to push the lawn mower.

Still fewer hours are possible, but only if man learns to increase his productivity by getting more per hour out of the machine.

It won't take long to make you hard-boiled after you've been in hot water a few times.

Proportionate to their body weight, turkeys are shorter in the legs than chickens. The heavy breeds of turkeys are proportionately shortest in leg, and the female leg is shorter than that of the male.

Town and Lions Club Jointly Purchase Inhalator

Oxygen Apparatus To Be Available For Emergencies

Through the co-operation of the town council and the Vulcan Lions Club an inhalator has been purchased and will now be available whenever needed in the town or district.

The inhalator is a special safety device for the treatment of persons suffering from respiratory failure due to drowning, smoke, gas fumes or electric shock. Such devices are in use in all the cities and the larger mines and have proven their value and effectiveness in restoring normal breathing in persons who have been overcome as mentioned above.

The unit to be used here is portable and very simple in operation, but is complete with all the necessary equipment for the treatment of more than one patient at a time or for the treatment of infants. During the summer months it will be kept at the swimming pool and for the balance of the year will be located at the fire hall.

A large number of persons will be trained in the operation of this equipment and trained operators will be available at a moment's notice to take the inhalator anywhere in the district where it may be required.

The inhalator is used in conjunction with artificial respiration, supplying a mixture of 7% carbon dioxide for stimulation and 93% oxygen for ventilation of the respiratory system. This gaseous mixture is supplied according to the demands of the patient's lungs when manual artificial respiration is in progress—naturally and completely and with no danger of harmful pressure.

The new inhalator will be a valuable addition to the equipment at the swimming pool and for the fire department.

Make Progress on South Highway

Construction of the south end of the new No. 23 highway is making good progress and crews are now working five miles north of Nobleford.

A new grade has been constructed to this point. Where the old route is to be followed, the grade will be made higher and the road widened. According to information reaching the Advocate it is expected that travelling of the highway from Monarch to Champion will be completed this fall.

Information as to the route to be followed from Champion north and when work on this part of the highway will be undertaken is not yet available.

Deliver First Winter Wheat

The first fall wheat to be delivered in Vulcan this season came from Del Thomas in the Reid Hill district.

The grain was delivered to the Alberta Pacific elevator here and grain buyer Lionel Chell reports that it weighed 62 lbs. per bushel. Although the yield per acre is not yet known, it is reported to be fairly good.

Subscriptions

There is a little matter that some of our subscribers have seemingly forgotten entirely. As we have stated before the Post Office regulations require that all subscriptions must be paid in advance. To us it is a very important matter—it is necessary in our business. We are somewhat modest on this subject and don't like to continually speak about such remittances. We must however, take off our mailing list from time to time those who are delinquent in their payments. We don't like to do this as we believe this matter has just been overlooked on the part of some subscribers, yet we must comply with the Post Office laws to keep our second class mailing permit. Check the date on the label on your paper to see how you stand on this matter.

New Store To Open Aug. 19th

Vulcan's newest business venture opens for business on Thursday August 19, when the Vulcan 5c to \$100 Store invites the inspection of the general public.

Proprietor of the new business is Mrs. J. P. O'Connell and the premises are in the Vulcan Furniture building.

Re-decorating and smartly styled fixtures combine to make the sectional glass display counters new store most attractive. The counters are finished in the new colonial maple weld-lex and the side shelves also have this attractive finish. Inlaid linoleum in a matching shade covers the floor and fluorescent lighting fixtures are used throughout.

An office occupies one corner at the rear of the store and store room space is also provided.

A.F. & A.M. Hold District Meeting

A district meeting of the lodges in District No. 11, A.F. & A.M., was held at the I.O.O.F. Hall Tuesday of this week, with 60 delegates present from Nobleford, Barons, Carmangay, Champion, Lomond, Blackie and Vulcan lodges.

The ladies of the O.E.S. catered to a banquet at 6:30 p.m. and the meeting is reported to have been very successful.

Present at the meeting were: Grand Master M. Wor. Bro. W. H. Henry of Lacombe, Grand Secretary M. Wor. Bro. George Moore of Calgary and District Deputy Grand Master V. Wor. Bro. D. D. McQueen of Vulcan.

Wor. Bro. R. D. Robbie of Vulcan was elected District Deputy Grand Master for the 1949-50 term.

The Weather

Skies have been alternately clear and cloudy this week but the weather has been generally warm. The occasional very light shower has fallen in Vulcan and some light hail damage has been reported in the Nanton area, across the Little Bow river.

Many Services of Salvation Army

The Salvation Army's 1948 Year Book just published reveals an expansion of services in almost all of the 98 countries and colonies in which the organization is at work.

Latest statistics show that The Salvation Army is now maintaining 17,813 corps and outposts with 1,638 social institutions in full-time operation. These institutions include shelters, hostels, food depots, hospitals, homes for children and the aged, unmarried mothers, and receiving homes, homes for the blind, leprosiaries, training schools for criminal tribesmen, prison-gate homes and inebriates' homes.

The Year Book states that in the educational field The Salvation Army is operating 1,078 day schools in various countries and colonies. Work among permanent service personnel is continuing, and 34 naval and military homes, most of them located at well-known military bases, are in operation.

Full-time officers in the Movement now number 32,105. Since war's end a number of Salvation Army periodicals have revived and total periodicals now published number 111, with total copies reaching 1,746,274 per issue. The number of beds and meals supplied by The Army internationally during 1947 totalled 44,713,485.

Prison-gate homes opened their doors during the year to 1,787 ex-criminals who remained under Salvation Army influence until ready to take their place in society. During the same period 1,885 such men were considered rehabilitated and passed out of the homes as satisfactory.

The best way to preserve democracy is to deserve it.

STILL WAITING FOR THAT ROAD

It looks like Vulcan and district residents will have to continue using the Nanton route to Calgary for another year. The new Lethbridge-Calgary route through Vulcan, which was supposed to have a top priority this spring, has had to take a secondary place to urgent repair work on main highways. Possibly we can't blame the government entirely, for they couldn't force the heavy road-damaging rain of this past spring, but we hoped to at least see a start on construction of the new grade north-west out of Vulcan.

Work has started on the south part of the new highway, from Lethbridge to Champion, with a new highway grade being constructed and crews

working northward from where the highway branches off from the Lethbridge-McLeod route, one mile west of the existing branch. An entirely new route will be followed northward to Barons. The route from Barons to Champion will be the existing one but a new highway grade will be constructed. The route from Vulcan north has not yet been announced.

CLEANING UP THE COMICS

In a few months American readers who buy 50,000,000 comic books a month should find them some 30 per cent less lurid, sadistic, sexy, vulgar, and crime-breeding. That is to say the publishers of 30 per cent of the books have undertaken to clean up their own publications.

Some American cities have already banned the worst of the comics. Canada has a blacklist, and Australia bids fair to take action against them. We trust the publishers of the remaining 35,000,000 comic books sold monthly know how to read the signs and portents which foretell the dread hand of censorship unless they join in the movement to clean themselves up. At best, some of the major problems raised by the comics remain beyond the reach of legal action or even an industrywide code. The crudity of imagination and execution which debauches taste, the appeal to the "sock in the jaw" as the ultimate arbit of right and wrong, inanity and poverty of thought—these are likely to remain until the public starts buying something better.

—Christian Science Monitor

English Journey

BY WALTER R. LEGGE

ARTICLE 4

The Flowering Countryside
In a previous article I referred to our first breath taking view of the English countryside in spring.

England at this time is like one vast flower garden for it is ever so humble, there is no place without its flower garden, and just now they are a glorious sight.

While most homes have a vegetable garden, the flower plots are not forgotten. I do not believe that they are kept up in a spirit of "keeping up with the Jones," but on account of the English love of beautiful things.

Most houses have a flower garden in front, but in cities and other places where the houses have been built on the edge of the sidewalks the flower gardens are at the rear.

Early builders seemed to have had a passion for driveways through a building to a courtyard in the rear, in the manner of the early inns. Usually these openings reveal a glorious vista of flowers in the courtyard.

At the middle of May the flowers in England are just at their best. The tulips are almost over but there are almost masses of Brompton stocks, mostly white and blue narcissus, daffodils, wall flowers, auriculas, aubretia, cowslips, lilies of the valley, candytuft, columbine, cupins and many others. In the larger shrubs there are rhododendrons, hawthorn, of May, azaleas, broom roses, etc., while the trees in flower include Judas tree, Cabrunum, lilac, and chestnuts. The chestnuts are particularly fine.

Climbing shrubs in bloom include roses, clematis, and wisteria. The laburnum and wisteria are not seen in Eastern Canada. The laburnum trees vary in size from small ones of 6 or 8 feet in height up to good sized trees. At this season they are covered with yellow flowers that hang down from the branches in great clusters from 6 to 10 or more inches in length.

The wisteria vines are trained over the walls of houses and have similar pendant branches of flowers only mauve in colour. In the woods and fields blue bells grown wild and in such profusion that a bouquet can be picked in a few minutes.

Along many of the roads the high hedges of hawthorne or May are covered with white flowers.

The broom is a wild shrub which has yellow blossoms. The only part of Canada that I have seen it in, is on the Pacific Coast. Spring is the best time to visit England and the best way to see it is from the top of a double-deck bus. There are few places left in England that are not reached by some bus line and most of them are two deckers.

The motion on the upper deck of one of these busses is something like that experienced in riding on a camel, but it is worth it. There are a surprising number of high hedges, stone or brick walls lining the sides of the roads, but the passenger on the upper deck of a bus can look over most of the hedges and walls and see the beautiful gardens back of them. It is a pity that so many beautiful spots are hidden behind these walls.

With such a profusion of flowers it is only natural that there are bunches of fresh cut flowers in nearly every home but the strange part is that there are so many flower sellers.

There are in some places, especially in the larger centres, not only florists in stores, but push carts loaded with cut flowers, and also corner flower sellers. One

would think there would be no market for flowers with so many at every home.

Then there are evergreen shrubs, many of them cut and trained into fantastic shapes and designs. Most of these evergreens are of a darker hue and bushier than those in Canada. Many of them are yews, the English variety being an evergreen of very slow growth, but living to a great age, 300 or 400 year old trees being common. They can be clipped into all kinds of designs.

They are frequently seen in churchyards where they impart a graceful solemnity. Some of the churchyards I have seen in which they form an impressive part are at Stoke Poges, Beaconsfield, Charlesbury, Dorchester, Bunford, Waddesdon, Chalfont, St. Giles, etc.

With such a widespread mass of flower gardens it is no wonder that there are numerous songbirds adding to the glories of the countryside.

Their songs fill the air and there is one that I had never heard before the cuckoo. I heard my first one in Stoke Poges churchyard, but since then have heard them in many places, and there is one that tries to wake me up each morning at Amersham.

The most enjoyable way to see English countryside is to stay in some centre, such as Oxford, Aylesbury, or some smaller place and make daily excursions into the countryside to interesting and historic spots.

The buses do not travel fast and every little hamlet is interesting and beautiful, and has some ancient landmark worth seeing and visiting.

In the smaller places there are many thatched roofs on the old houses and barns. They are most picturesque. I am told that a good thatched roof is about 18 inches thick, is perfectly waterproof, lasts from 15 to 20 years, and makes a building cool in summer and warm in winter.

It is not such a difficult job to do as many people think, and a cousin of mine, at Shifford, has recently replaced a thatched roof himself.

The only drawback to these thatched roofs is that they harbour rats and mice who find the straw to their liking.

While some of the more pretentious gardens are not yet back to their pre-war elegance, they are really wonderful to see.

I visited Blenheim castle at Woodstock, one of the largest and finest in England. Before the war 60 gardeners were employed all the time. The wall around the grounds is twenty miles around.

Most of these large homes gave up part of the buildings for war work and at Blenheim there are still a number of shacks that spoil the view of the castle.

This castle which is the home of the Duke of Marlborough, covers three acres, and is set in grounds which cover 2,500 acres. The avenues and trees are said to have been set out to represent a plan of the Battle of Blenheim with a tree for each soldier that fell. One avenue stretches for two miles from the palace.

There are Italian gardens, flower gardens, rock gardens, and others making a gorgeous show place.

On another day I visited Hampton Court Palace. The gardens here may not be as fine as before the war, but are beautiful today, and must cover thousands of acres. There were immense beds of tulips, and many other flowers.

Hampton Court was built in the reign of Henry VIII by Cardinal Wolsey who had a household staff of 500 and 290 richly furnished rooms were always prepared to receive guests.

Cardinal Wolsey turned Hampton Court over to Henry VIII who brought there as his Queens Anne Boleyn, Jane Seymour, Anne of Cleves, Catherine Howard and Catherine Parr.

Other kings and queens who lived or held court there were Edward VI, Mary, Elizabeth, James I, Anne, Charles I, Charles II and George II. The only reason that it escaped destruction during Oliver Cromwell's time is that he had it retained for his own use. In Queen Victoria's time nearly 1,000 rooms were made into 45 separate apartments granted by the sovereign to widows or children of distinguished servants of the Crown.

One of the most famous features of Hampton Court is the Maze, but one does not need to go there to get lost. It is quite easy to do that in the gardens and grounds.

Hampton Court Palace is now preserved as an "ancient monument and historic building" by the Ministry of Works and it is visited by thousands daily.

From Hampton Court boat trips may be taken on the River Thames in one direction to Windsor and in the other to Kingston, Richmond and London.

The river is bordered by lovely homes and gardens, most of them quite modern in appearance.

Another delightful day was spent at Windsor Castle but that will be dealt with in another article.

There are six yards of railroad for every person in Canada.

Men don't act on being informal but on being inspired.

A Toronto lumber dealer who sold nails as a sideline was fined \$3,000 for selling nails at "an unreasonable and unjust price." He made a profit of 29 per cent on the nails instead of the standard 12 1/2 per cent.

ADVERTISING DOESN'T COST — IT PAYS

Why do business houses advertise? The question is often asked and various replies have been given, but the late Wm. Wrigley possibly gave the most acute reply when travelling on an electric train speeding into New York. A friend asked him why he spent so much money on advertising when he had made a fortune and founded a multi-million dollar business. Wrigley's reply was: "We are riding along merrily on this train, but should the power be suddenly cut off, we would begin to coast and finally come to a stop." Advertising is to merchandising what power is to an electric locomotive. That is the reason why all successful businesses spend between three and four per cent of their gross sales each year on advertising.

Advertising not only builds business but it reduces the cost of manufacturing articles by creating a large demand for goods which in turn allows for mass production and the result is lower production costs.

Manufacturers, retailers and those who serve the public need to tell people continuously about their goods and services if they wish to continue to sell to these same people, and no matter how they advertise, whether in the local paper or by direct mail, they must invite the customers to their store and offer them some inducement to come.

As to the best means of advertising, there is no doubt about it that newspaper space offers the cheapest and surest results.

The proper advertising is cheap — and advertising doesn't cost, it pays.

Youth Fellowship every other Friday evening.
We invite our friends to worship with us.
F. E. VORRATH, Minister.

The Advocate staff cannot make a house-to-house canvass for news every week, but we are always glad to have it phoned or handed in. We want all the news and are just as pleased to mention your guests or your visits as those of your neighbors—but maybe your neighbors co-operated with us in getting the facts. Phone your items in or drop them in at the office—as early in the week as possible. Your co-operation will be appreciated.

The Fly---Public Enemy Number One

A famous American authority on insect pests recently stated the common housefly is the most dangerous living thing within the United States. This statement also applies to Canada, especially Canadian farms where flies are present in astronomical numbers during the summer and early fall.

Due to its breeding places and its habit of crawling over all varieties of filth, the fly is a carrier of many diseases of man, domestic animals and poultry. Most health authorities agree it is an important factor in the spread of typhoid fever, dysentery and many parasitic worms.

Like any other campaign against insects and disease, fly control should be planned to take advantage of the insect's habits and breeding places so attack can be made from every angle. Entomologists advise the following practices—in a full-scale anti-fly campaign.

Spray manure piles and other known breeding places with a 50 per cent DDT wettable powder at the rate of one pound of powder to eight gallons of water. This will destroy developing maggots and egg-laying adults.

Walls and ceilings of barns and stables should be sprayed every four to six weeks with a solution containing one pound of 50 per cent wettable powder in one gallon of water. This amount of spray should cover 1,600 square feet.

Farm animals should be sprayed with a solution of one pound of 50 per cent wettable DDT powder in 10 to 20 gallons of water. With this protection they will show appreciable weight gains. Cows will be much easier to handle at milking time.

A fly-free house and kitchen is possible with the use of DDT household sprays around doors, window sills, screens and other places where flies gather or are likely to enter the house.

The introduction of smaller sized tractors has made possible greater mechanization of the smaller farms and the development of equipment which can be mounted on the tractor has made the tractor suitable for row crop production.

Good Season Winter Wheat

Dominion Experimental Station
Lethbridge Alberta
Weekly Letter

This season is proving a particularly favourable one for winter wheat in localities adapted to this crop where practically no winter killing occurred during the past winter in the varieties that are considered the most winter hardy. The previous winter had proved one of the worst for winter wheat as many fields were lost from winter killing. It was unfortunate that these losses discouraged many farmers from seeding winter wheat last fall. Those who did seed have found it a great advantage during this late wet spring to have at least a portion of their seeding operations disposed of and also to have now a crop of winter wheat which promises to definitely outyield their spring wheat.

Chemical weed killers have now been developed to the point where they are giving good satisfaction on the weeds which are generally most troublesome in the winter wheat, particularly tumbling mustard and stink weed. The cost is not prohibitive and many farmers who have sprayed their fields this season look upon this method of weed control as a great advantage in winter wheat production. This is in agreement with experiments at the Experimental Station, Lethbridge.

In certain fall seasons grasshoppers prove destructive to winter wheat, especially to crops sown before September. Investigators at the Dominion Entomological Laboratory, Lethbridge stated that results obtained to date indicate that grasshoppers can be kept well under control by spraying the fields with Chlordepe, using the type of spraying machine commonly used for spraying weeds. This treatment is fairly expensive but by no means excessive on fields where grasshoppers are expected to be numerous. Spraying the marginal strips of the field is frequently sufficient. More information is required regarding this

WITH THE District Agriculturist PETER JAMIESON

PLANS FOR GRAIN CLUB TOUR

Plans have been completed for a cavalcade of club members and parents to tour the Vulcan Club area on Sunday, August 15th. The party will meet at the home of Mr. Ros Walker, the club leader, at 8:00 a.m. and follow a course which has been mapped out by the committee in charge.

The members will bring their own lunch with them. We would like to see a good turn out and meet some of the members who were absent on previous gatherings.

PRESERVING EGGS:

Water Glass:

Eggs preserved in water-glass will keep several months and can be used for all kinds of cooking—can be scrambled, fried or poached, but cannot be boiled unless a hole is made in the large end of the egg with a pin or needle to permit the air to escape. The yolk, in water-glass preserved eggs, is liable to break easily and the white becomes watery and does not beat up well.

When preserving in water-glass use a five gallon crock or jar, being sure it is thoroughly clean and dry. Bring nine quarts of water to boiling point and when cool, place it in the crock. Add one quart of water-glass (sodium silicate) and stir and mix thoroughly. Put in the eggs.

This quantity will be enough for preserving 14 to 15 dozen eggs, which may be immersed in the solution all at one time or added as they accumulate.

Be sure that the solution is always at least two inches above the eggs at all times. Cover the crock to prevent evaporation.

Dry Packing:

Eggs which are to be kept for a short time only can be preserved by packing them in bran, shorts, oats or sawdust. Great care must be taken to see that the packing material is perfectly dry and free from dust and odors. If the pack-

form of grasshopper control, but it has appeared quite promising to date.

ing material danger of losing eggs by mould on the inside of the shell. If the packing material carries any odor it will be absorbed by the eggs and render them undesirable for food.

HOW OFTEN SHOULD FARMERS PURCHASE NEW SEED:

Now, as fields are beginning to ripen, it is a good time to look them over to see whether they are good enough to provide seed for another year or whether a change would be profitable.

The authorities tell us that registered or certified seed should be purchased when a crop has become mixed with undesirable varieties. It is commonly found that sufficient mixing occurs in about 3 or 4 years to make it profitable for a farmer to change seed.

Plant breeders are continually producing new varieties and the adoption of these in suitable areas should be considered. Only recommended varieties, however, and only those considered to be a definite improvement over those already being grown should be secured. The fewer varieties being grown in a district the less is the danger of mixture occurring.

Certain plant diseases may be kept under control by purchasing new registered or certified seed. This does not, however, mean that such seed need not be treated against smut.

SOWING GRASS SEED IN THE FALL:

Some farmers have found that a good way to start Grass Seed in Southern Alberta is to drill about 8 pounds of Crested Wheat Grass, for example, into the stubble just before freeze up, seeding shallow. These seeds will germinate with the melting snow in the spring and get a good start before the dry season starts.

Consult your local Forage Seed Crops agent about getting an or-

VULCAN GRAIN CLUB TOUR

The members of the Vulcan Grain Club had a meeting on Friday, July the 30th and decided that their club would make a tour of the members' plots. A committee was appointed to form plans and draw up a program and the date set for this tour would be August the 15. As this is the first year of the club it would be very interesting for the members to examine other plots of wheat besides their own and compare their own plots with those of fellow members.

Full details of the plan will be announced by the committee in the near future. Mr. Morrison told the members club posters would be provided by the club sponsors namely, The Lions Club of Vulcan and the Alberta Wheat Pool. These posters will make a nice finishing touch to the plot being displayed.

FOR THE LOCKERS: FREEZING VEGETABLES

The following items are taken from an article prepared by Mr. P. D. Hargrave, and Miss N. J. Hogg on results of experiments over 4 years of frozen food testing. This summary gives information that may be useful to housewives for getting vegetables ready for the locker.

1. All vegetables except green peppers must be blanched before freezing.
2. Late and midseason corn var-

ieties give excellent results as kernel or on the cob products.

4. Firm heads of Brussels sprouts blanched 2½ minutes and frozen as individuals result in a satisfactory product.

5. Broccoli of the purple broccoli cauliflower type is the most successful freezer.

6. Some varieties of cauliflower in small whole heads or flowerets 1½ inches blanched and dry packed are excellent.

7. Rhubarb proved outstanding as a frozen product with the variety Macdonald the best, followed by Ruby and Valentine.

8. Native Alberta Plums sliced and packed in sugar or syrup result in an improved product as compared with other methods of processing these fruits.

9. The addition of ascorbic acid prevents discoloration of yellow and orange colored fruits.

10. The use of ascorbic acid dissolved in syrup is most effective.

11. Shredded and finely diced vegetables are not satisfactory.

12. Carrot sticks as prepared do not freeze satisfactorily. Carrots blanched, frozen and cooked with peas give an interesting and flavoured product.

13. Correct stage of maturity plays an important part in successful freezing, particularly in peas.

14. Beets diced, blanched and packed in brine result in a good frozen product.

15. Turnips diced and frozen are satisfactory.

16. All varieties of winter squash cubed freeze successfully.

17. Tomato puree frozen with the addition of sugar and salt is

satisfactory.

18. Containers should have adequate space for labelling, be neat, compact easily stored. Inside surface should be finished so as to make it impregnable to moisture and vapors.

PREVENT GULLIES FORMING IN THE FIELDS

Water erosion has become a serious problem in many places in Western Canada this spring due to the above normal rainfall. As a result of the heavy spring runoff, gully and sheet erosion have become very pronounced. Where gullying has already occurred, steps should be taken to check the damage. The natural drains or water runways should be seeded down this season in sufficient time to allow the sod to become established before this winter. The best results have been obtained with a grass legume mixture seeded down with a cereal nurse crop. Once established the grass legume mixture will provide hay and pasture, and prevent further damage from water erosion.

WHEAT

British farmers will receive on millable wheat delivered after August 1st the equivalent of \$2.33 a bushel in Canadian money, increasing month by month to \$2.60 a bushel in June.

The United States corn crop was estimated at 3,328,862,000 bushels on July 1st, substantially above the 1947 production of 2,400,952,000 bushels.

Wheat production in the United Kingdom is now estimated at 96 million bushels, compared with 62.7 million in 1947 and the 1935-39 average of 62.4 million bushels.

Registration of Birth Important

Registration of births is of more importance today than it has ever been, according to a bulletin issued by the provincial department of Public Health. They are now necessary, not only as proof of age in such matters as family allowances, insurance policies, and superannuation and pension schemes, but they are also required for identification purposes by Canadians seeking entrance to the United States.

With this new importance of the birth certificates has come a surge of requests for registration from persons whose parents had neglected the formality, if indeed there was any provision for it, at the time of birth.

Unfortunately many such registrations have been falsely sought by aliens not born in Canada as well as by persons who, for some reasons, wished to establish false ages. War and the formulation of plans for family allowances brought an unsatisfactory situation to a head at the 1944 Dominion-provincial conference and it was made obligatory for all persons to produce proof for registration purposes and the identity of his parents, thus bringing the practice all over Canada in line with Alberta vital statistics procedure.—Hanna Herald.

The national coal board of Britain reports that for the first year of pit operations the nationalized coal industry lost \$93 million.

SUMMERFALLOW The Modern Way

USE

A MASSEY HARRIS Front-Mounted Sprayer and Agricultural Weed-No-More 2, 4 - D

1. It kills weeds.
2. Leaves the stubble standing to check wind erosion.
3. No new weed seeds brought to the surface.
4. The top soil is not disturbed. This checks evaporation from the subsoil.

The Next Five Years Can Be The Best

ALBERTA TODAY HAS THE BRIGHTEST OUTLOOK OF ANY CANADIAN PROVINCE. THE VASTNESS OF HER NATURAL RESOURCES, THE ENTERPRISE OF HER PROGRESSIVE PEOPLE AND THE SOUND ADMINISTRATION OF HER PUBLIC AFFAIRS HAVE BROUGHT ALBERTA TO THE THRESHOLD OF A GREAT ERA OF ECONOMIC AND INDUSTRIAL DEVELOPMENT.

THE RE-ELECTION OF THE GOVERNMENT UNDER WHICH OUR PROVINCE REACHED ITS PRESENT POSITION WILL ASSURE THE CONTINUATION OF ALBERTA'S OUTSTANDING PROGRESS AND MAKE CERTAIN TO ALL HER PEOPLE THE INCREASED BENEFITS THEY WILL REAP FROM THE STILL GREATER PROGRESS AND DEVELOPMENT OF THE NEXT FIVE YEARS.

THIS IS YOUR SOCIAL CREDIT GOVERNMENT TEN-POINT PROGRAM FOR THE NEXT FIVE YEARS!

1. Natural Resources

The rapid and orderly development of Alberta's vast natural resources in the best interests of all her citizens.

2. Agriculture

A vigorous program to further improve and stabilize Alberta's basic industry — farming.

3. Electrification

Extension of rural electrification throughout Alberta as rapidly as possible.

4. Health

The progressive expansion of Alberta's public health and social welfare program — already one of the best in Canada.

5. Municipal Affairs

A new and better deal for Alberta municipalities through implementation of the Judge Commission Report.

6. Education

Constant efforts to still further improve Alberta's modern system of education and reduce the cost to municipal districts.

7. Roads

Progressive extension of Alberta's road program until the entire province is served by an adequate system of all-weather highways and roads.

8. Industrial Development

Industrial and economic development to increase Alberta pay-rolls and save excessive freight charges on exports and imports.

9. Labour

Full co-operation with labour and management to secure just rights of both and assure uninterrupted production.

10. The People's Rights

A continuation of the Government's unrelenting fight

to make secure the right of each and every citizen to social justice, economic security and individual freedom.

Champion and District

In the annual baseball tournament, Wednesday, August 4th, Picture Butte Royals took top money by defeating Champion 5 to 1 in the finals.

Previously the Buttes won their way into the finals by defeating Parkland, while Champion gained the final berth by a 12-0 victory over Enchant, Wednesday afternoon.

In losing, Champion dropped its first game of the season. The largest crowd to attend a baseball game in Champion in many years was on hand for the Picture Butte contest.

Batteries:

Champion	500 051 200 12
Enchant	000 000 000 0

Enchant — Jacobson, Petrie (4) Jacobson (5) and Howe:	
Picture Butte	100 031 000 5
Champion	000 001 000 1
Picture Butte — R. Findley and Cook:	
Champion — Chilton, Siler (5) and Latiff, Watts (5)	

Mrs. M. Sanderson and Mrs. Geo. Rhodes were recent visitors at Ponoka, guests of the former's son-in-law and daughter, Mr. and Mrs. B. Ruggles.

Mr. and Mrs. Lyons were recent visitors at Nobleford, guests of their son-in-law and daughter, Mr. and Mrs. Barby.

Mr. and Mrs. D. W. Greenlee were Calgary visitors for two days last week.

Mr. C. Villet and children, Shirley, Gary and Leslie are holidaying at their ranch, near Waterton Lakes.

Mr. and Mrs. R. Maxwell and daughters, Audrey and Leora, are visiting relatives in Saskatchewan for two weeks.

Mr. Al Graff of Medicine Hat, Alta. visited for several days at the home of his son-in-law and daughter, Mr. and Mrs. D. Deal.

Mr. and Mrs. Fred Watt had as their dinner guests on Monday, Mr. and Mrs. H. Linton of Burns Lake, B.C., and Mrs. P. Patterson.

Mr. and Mrs. H. (Jock) Marshman were visitors in Red Deer Sunday, when they attended the wedding of Elizabeth Goodman, formerly of Champion.

Mrs. E. Griffin was a recent visitor in Calgary.

Mrs. H. Smith visited in Calgary for several days last week, guest at the home of Mrs. H. Hayden.

Mrs. W. Marsh and daughter, Marian of Vauxhall visited for several days at the home of the former's sister, Mrs. Lyon and Mr. Lyon.

Mr. and Mrs. F. Little had as their guests the past week, the latter's father, Mr. Shannon of Winnipeg.

Mr. U. S. Alexander was a Ret-law visitor on Sunday looking after farming interests.

Mr. and Mrs. B. Siler have recently moved in to the Renaldi residence and Mr. and Mrs. J. Marshman have moved in to the H. Smith residence, formerly occupied by the Silers.

The foundations for the Gospel Mission Church has been nearly completed and it is expected that the building purchased, to be used as a church, will be moved in shortly.

T. B. Northfield, Optometrist, formerly of the T. Eaton Co., Lethbridge will be at the Savoy Hotel, Champion, on Saturday, July 17, for the purpose of examining eyes, etc. Calgary office: Fifth Floor, Southam Bldg. 52-1c

Work on the basement for the Masonic Hall has been started.

Mr. and Mrs. A. Orcutt have as their house guests, Mrs. Chas. Rollins, Portland, Oregon, D. D. Orcutt and Mr. and Mrs. O. Orcutt of Warner.

Mr. Frank Racher of Calgary, is visiting in the district with members of his family.

Mr. and Mrs. Bailey spent the weekend at Olds, guests of the latter's parents, Mr. and Mrs. Curtain.

Mrs. Wm. Hannon, Mrs. Morton of Arcola, Sask. and Mr. Wm. Urquhart, Mitchell, Ont., spent several days at the home of Mr. and Mrs. A. Nelson recently.

No. 2 C. W. Rye, weighing 59 pounds, from the farms of Griffin Brothers and E. Olhiser, was the first 1948 grain delivered to the Alberta Pool Elevator this season. It was delivered on Aug. 4th.

Grade 12 students received their exam results the past week, and all were successful in passing the final tests.

Mrs. Schafer, who has been a patient in the Holy Cross Hospital, Calgary, has returned home.

Mrs. B. Siler was a weekend visitor in Calgary, guest of her mother, Mrs. W. Ellis.

Mr. R. Sansome has been a patient in the Vulcan Hospital.

Mr. and Mrs. Fred Wood and Linda of Sault Ste. Marie were visitors with Mr. and Mrs. G. Dow for a few days.

Mrs. T. Ralsbeck of Taber is visiting at the home of her son and daughter-in-law, Mr. and Mrs. W. Ralsbeck.

Mr. and Mrs. F. Clever, accompanied by Mrs. C. McLean, were Calgary visitors last week.

Miss Alta Powell is a patient in the Vulcan Hospital.

Mr. and Mrs. E. L. McNary, Camrose, Alta. and their daughter and son, Dorothy and Walter, of Edmonton, are guests at the home of Mrs. McNary's sister, Mrs. D. Greenlee, and Mr. Greenlee.

Mr. Paul Diemert of Leduc, Alta. is visiting at the home of his mother, Mrs. A. Diemert.

Winter Wheat

(Experimental Farm News)

The three varieties of winter wheat most commonly grown in Western Canada at present are Kharkov, Yogo, and Jones Fife. For many years these varieties have proved satisfactory in the south-western part of Alberta, the chief winter wheat growing area in the prairie provinces. It is important to consider the characteristics of these varieties when selecting one of them for growing either in this winter wheat area or elsewhere, says W. D. Hay, Dominion Experimental Station, Lethbridge, Alberta.

Kharkov (preferably the M.C. 22 strain) and Yogo are probably the two most winter-hardy varieties under conditions that exist in the prairie provinces, and for that reason are the two most suitable in Western Canada. Yogo is a little superior to Kharkov M.C. 22 from the standpoint of non-shattering, but Kharkov M.C. 22 excels Yogo in strength of straw. They are both bearded varieties.

Jones Fife is a beardless variety and for that reason is preferred by a number of farmers. It is less winter hardy than the other two varieties and should be recommended only in areas where winter wheat survives fairly consistently.

When no loss occurs from winter killing these three varieties are practically equal in yield. The average yield at the Lethbridge Station on dry land summerfallow for an eight year period is: Kharkov M.C. 22, 34.5 bushels per acre; Yogo, 34.5 bushels per acre; Jones Fife, 33.5 bushels per acre.

The average yield for Marquis

Cinders and Sight

Caution should be observed when foreign bodies lodge in the eyes as medical men know such bits of dust and grit may cause very serious damage. Usually the individual can remove the foreign body by irrigating the eye with boiled water or with boracic acid solution using a clean medicine dropper. The solution should be dropped into the eye at the corner nearest the nose, holding the head so that it will run out at the other side. Tears will help remove the particle. If additional help is required, see a doctor at once.

spring wheat for the same eight years on dry land summerfallow and under comparable conditions was 31.8 bushels per acre.

"Shop at Home"

Vulcan merchants take great pride in their town and endeavor to bring about all the improvements necessary to give their customers the best in shopping-satisfaction, both as to merchandise and shopping service.

District residents are becoming more and more conscious of the advantages of shopping in their community too. Not only is it convenient, but the quality of the merchandise available right here at home is the equal of that obtainable elsewhere. Anything and everything can be bought in Vulcan where practically every phase of business life is represented.

"Shop Locally" may be the slogan of the merchants, but it is much more than that. It is an invitation and a bit of wise counsel for the residents to patronize their merchants and at the same time to take advantage of the excellent services being offered close to home.

**MOULTING OF
YEARLING POULTRY**

Anyone contemplating carrying over yearling hens for fall and winter egg production should force moult these birds immediately, advises C. W. Traves, Poultry Commissioner, Alberta Department of Agriculture. This gives a much shorter moulting period and a more uniform egg production when prices are at their best.

Select only the best of birds and put these out on a good green range away from the laying house. A complete change is necessary to

stop production and start the moult. Feed whole grain and water until they start to grow the new feathers and then include a good quality growing mash. Six to eight weeks from the time they are taken from the laying house they should be ready for another season of good production.

During the time that the birds are on range the laying house should be thoroughly cleaned, disinfected and made ready for the birds when they are brought back in.

District News

(Continued From Front Page)

KIRKCALDY

Mr. and Mrs. S. Bernard and family were Drumheller visitors at the home of relatives for three days of last week.

Mrs. H. Mitchell entertained a number of the younger set on Tuesday afternoon, Aug. 10th, the occasion being her daughter Frances' eighth birthday.

Mr. and Mrs. Frank Nichol of Lomond visited at the home of Mr. and Mrs. G. Urquhart on Wednesday of last week and were accompanied by little Miss Ora Jane Urquhart, who will visit at Lomond for a few days.

BRANT

Mrs. B. Prater returned home recently after spending the past 3 months with her parents at Forest Grove, Oregon.

Mr. and Mrs. B. Ball and family have returned home after holidaying at Vancouver and points in the United States.

Mr. and Mrs. A. Heggins and daughter returned home last week after a two weeks holiday spent in the States and at Vancouver.

Mr. and Mrs. H. Bateman recently spent a few days visiting relatives at Lethbridge and Blairmore.

Mr. and Mrs. G. Thompson and family are spending their vacation at Waterton Lakes.

The 1st Brant Ensign Girl Guides will hold a Tea and Bake Sale at Brant Hall, 2 p.m. Friday, Aug. 13. Everyone is welcome.

The monthly meeting of the Brant Ladies Aid was held on Aug. 5 at the home of Mrs. Harry Green. There will be no September meeting on account of harvest. The next meeting will be held on October 7, at the home of Mrs. S. R. Graham.

Mr. and Mrs. Geo. Bateman returned home last week after spending two weeks at the home of their daughter Mrs. Oran Bignell of Trail, B.C.

Don't forget the big dance at Brant on Friday August 13. Music by Carl's Swing Band.

Mr. and Mrs. M. Bignell and Wayne returned home last week-end after holidaying the past two weeks with their sons, Lloyd and Oran, at Trail, B.C.

Swathing of fall wheat and fall rye is well underway in this district, while the spring crops are beginning to ripen.

LOMOND

The first carload of lumber for Lomond's new school has been unloaded.

Mr. and Mrs. Martin Maronda and son are spending a week at Calgary and Red Deer.

G. Susinski was home on leave from his army training at Calgary.

Mr. and Mrs. L. Huff and family are back from two weeks at the coast, where they visited Mrs. Huff's parents, Mr. and Mrs. J. Stander.

Mr. and Mrs. J. Beeston are home from a week's holiday.

Mr. and Mrs. Lloyd Benson are the proud parents of a baby daughter, Judy, born in the Vulcan hospital.

Mr. and Mrs. W. Hendrickson are the proud parents of a baby son, born in Edmonton.

Mr. and Mrs. G. Hedges are vacationing at Banff.

Miss Mary Brown is taking care of the Post Office in the absence of Mr. Hedges.

Mr. and Mrs. K. Sokvitne and Mr. and Mrs. J. Hendrickson spent a few days in Calgary attending the Rogers-Urdall wedding.

Mr. Harry Manning is visiting his daughters in Calgary.

Mr. and Mrs. Earl Helland motored to Calgary for the weekend.

Mr. and Mrs. G. Arrowsmith and Kenny motored to Waterton for a week's vacation.

Mr. and Mrs. H. Aseltine motored to Calgary to attend the wedding of their daughter, Louise.

BERRYWATER

Miss Marjorie Love of the General Hospital nursing staff, Calgary, is spending a holiday at her home here.

Mr. and Mrs. D. B. Smith are visiting in Calgary this week.

Mr. and Mrs. J. Chapman and baby daughter of Vulcan are spending a few days as guests at the Alan Smith home.

The Snake Valley Cobras played Kirkcaldy a game of fast-ball on Sunday, losing the game by a score of 10-8.

House guests at the H. C. Douglass home this week included Mr. Ed. Douglas, North Dakota, Mrs. C. Carr and son, John and Franklin of Okotoks.

Mr. and Mrs. L. Palmer accompanied by Norma Adam attended the Brooks rodeo last week, where Louie won first prize in the Brahma steer competition and captured a special prize in the same event. Other visitors to the rodeo were Orville Speer and Gordon Palmer. Orville Speer won 5th prize in the steer decorating.

Mr. and Mrs. Roy McIntyre returned on Sunday from a camping trip spent in the foothills west of High River.

Mr. and Mrs. L. Healy, accompanied by Mrs. C. McIntyre, Robert Puckett and Norma Adam, attended a community picnic held at the Crowfoot Ferry on Sunday.

Mr. and Mrs. R. Adam were Sunday guests at the McRoberts' home.

The Young Peoples' camp sponsored by the student minister, Mr. Hunt of Milo, Queenstown and Berrywater was held last week on the Highwood river and was well attended by 30 or more young people from the district points. Miss Jean Hunt of Calgary, sister of Mr. Hunt, assisted in leadership. The camp broke up on Saturday, with the young people returning home feeling that they had a very worthwhile week of Christian fellowship and outdoor life.

Miss Jessie Sinclair of Calgary is spending a few days with her mother and brother in the district.

Mr. and Mrs. Martin Hoffman and baby daughter were recent Calgary visitors, stopping enroute home to visit with Mr. and Mrs. Amey at Okotoks.

Mrs. H. C. Douglass accompanied by Mrs. W. Oldfield, Miss Ethel and Miss Margaret Campbell, Toronto and Mr. Herb Campbell, New Westminster, B.C. motored to High River on Thursday. Mrs. Douglass and Mrs. Oldfield attended a meeting of the West High River U.F.W.A. while the others went by bus to Calgary.

Mr. and Mrs. Tom Houlton and son, Reid Hill, were Sunday evening guests at the R. Adam home.

ARMADA

Mr. and Mrs. M. Pearson, Cassils, were Sunday visitors at the home of Mr. and Mrs. G. Brotherhood.

Mr. and Mrs. R. Howell and boys of Lethbridge were visitors a few days here on their way home from Banff.

The baby boy of Mr. and Mrs. Stan Marks has been a patient in the hospital in Calgary.

Mr. and Mrs. H. Craine visited

a few days at the home of the former's parents, Mr. and Mrs. C. Craine, at Calgary.

Mr. and Mrs. Don Beagle and family of Arrowood were Sunday visitors at the home of Mr. and Mrs. R. Beagle.

Mr. and Mrs. I. Kunkel and family are moving from town out to their farm. Mr. Kunkel has been the U.G.G. elevator agent here for many years. He will be missed in the elevator for taking in wheat as well as helping in many other ways. The best of

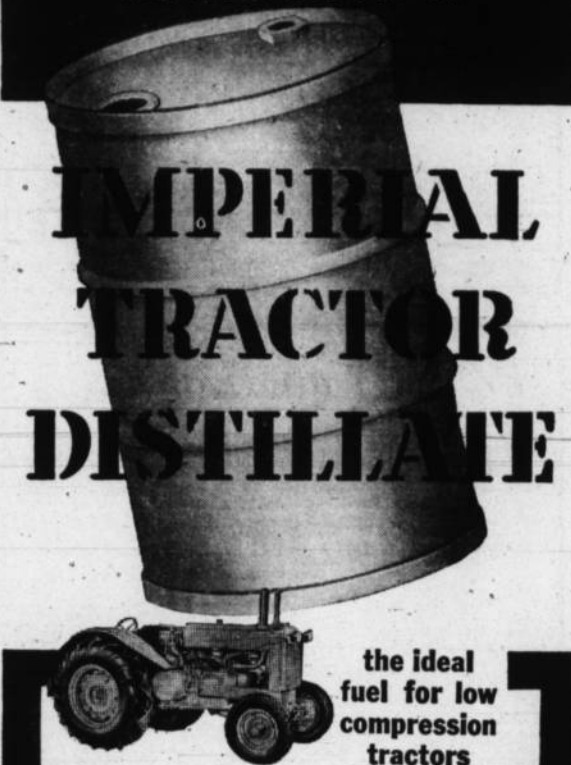

luck goes to them all in their new home.

Visitors from Armada to the Brooks stampede were Mr. and Mrs. Hendrickson and family. They reported a very good stampede.

Mr. and Mrs. G. Brotherhood, Jack Brotherhood and Cliff Andrews were Lethbridge visitors for two days.

Mr. and Mrs. J. Brotherhood and children are visiting at Red Deer at the home of Mrs. Brotherhood's parents.

VULCAN

Vulcan Flour Mill**Custom Chopping
Every Saturday****Commencing Aug. 14****WEEDS AND LEGUME****SEED PRODUCTION**

Don't expect to clean all the weed seeds out of your alfalfa and clover crops after the crops are threshed. It just can't be done.

J. E. Birdsall, Supervisor of Crop Improvement, Alberta Department of Agriculture says that roguing (hand pulling) of weeds and other plants, the seeds of which cannot be cleaned out of the threshed crop, will pay big dividends. It will pay to hire extra help for this work where necessary, since the presence of these seeds in the legume crop will greatly reduce its value.

Sweet clover is considered a bad weed in other clover crops. Alsike clover seed is probably the most difficult from which to remove small weed seeds. Timothy, night flowering catchfly, lambs quarters, American dragonhead, wild mustard, sweet clover, Russian thistle and curled dock should all be pulled from this crop in the field. The same applies to wild mustard, sweet clover and American dragonhead in alfalfa and tawade seed crops. Alfalfa seed in alfaswede and alfaswede in alfalfa are also impurities.
